CLOSER TOGETHER MACHINES

No clearance space for ventilation

LESS NOISE

Electric motors reduce noise levels

REMOTE CONTROL VÍA APP

Easier and more intuitive remotely management

Vertical Ventilation

Eliminates clearance space between machines and allows **maximum use of space**.

Our machines are cooled by taking in air at the front of the machine and expelling hot air out the back and upwards.

Works with high temperature

Our machines are able to operate correctly at high temperatures for long periods of time **without engine damage or performance failures**.

5 years warranty*

The high level of **reliability** of our **components and parts** allows us to offer up to 5 years of warranty on the cooling system of our machinery line.

*Consult warranty conditions

Smart design

Parts design has been simplified and optimised to the maximum in order to **reduce cleaning and assembly times**, as well as to avoid small parts losses.

Electric motor

Our unique brushless motors are more efficient and durable.

They also significantly **reduce** our machines **power consumption and noise levels**.

In addition, they allow us to have greater **control over the product consistency** to suit a wider variety of products and recipes.

User-centred

Throughout design and development processes of the machinery line, our efforts are focused on **facilitating the end users' work** with our machines.

Works with alcohol

Our improved cooling system is able to work **correctly** with recipes containing **up to 40% alcohol** without overstressing the machine or posing a possible risk of breakdown.

Tecnología Fast cooling

Faster cooling with lower power consumption.

Our Fast Cooling system **improves machines performance** and substantially **reduces cooling times**.

V AIR Connect

An app which allows users to **configure and control** all the machines they work with from a smartphone. From programming work schedules to changing light colour, V AIR Connect app provides **machine full control** in a simple and intuitive way.

Direct Drive Mixer Motor

Integration of Direct Drive technology minimises motor parts number and increases their **reliability and service life**. In addition, the absence of belts eliminates the costs and inconvenience caused by belt breakage.

Cyclic Reverse

Our unique Cyclic reverse system allows you to maintain the best product appearance at all times. It consists of a programmed change of the paddle direction to ensure **more efficient mixing** and a more homogeneous and appetising product.

Hot Gas

Hot Gas system allows product to melt up to 75% faster preserving a **better slushy texture** and giving it a **more appetising appearance**. Thanks to Hot Gas, you can always offer a freshly made slush, more quickly and with less electricity consumption.

Smart Check

A pressure sensor in our machines' cooling circuit enables pressure loss **detection** in a **more efficient and rapid** manner. This reduces costs and technician visits.

Sistema Smart Cooling

Our unique Smart Cooling system ensures the **right temperature in all tanks** of the machine and **improves its performance**.

The high capacity drink cooler

The **most innovative** cooler in the industry, perfect for cooling or keeping any type of fruit or water-based drink cold in **the smallest space**.

Its **19-litre bowl** makes it perfect for hotels, cruise ships and all types of high-volume consumption businesses.

IDEAL FOR:

Juices, cold tea, flavoured waters, lemonade and water-based drinks.

Innovative design for cool drinks

A dream come true

A **high-capacity** machine that can produce traditional frozen beverages, dairy-based and alcohol-based products **in less than 20 minutes**.

With an elegant and easy-to-handle design for an **easier and faster cleaning**.

A machine made to revolution the frozen cocktail experience that can be managed remotely with the **V AIR Connect** App.

IDEAL FOR:

Frozen cocktail, slush, sorbet, dairy slush, frappuccinos, smoothies, creams...

- ✓ APP REMOTE CONTROL

A high capacity machine for frozen cocktail and more

Slush machine goes one step further

The slush machine that has forever **changed the slush business.**

A more aerodynamic design, a **better use of space** and more agile and hygienic working routines thanks to the reduced number of parts.

In addition to traditional frozen beverages, its optimal performance with dairy-based and alcohol-based products is guaranteed.

IDEAL FOR: Frozen cocktail, slush and sorbet

Our first application of Vertical Ventilation

The slush machine of a new era

The most compact professional high capacity slush machine on the market.

It offers the **maximum innovation** in the smallest space and with the most authentic **style**.

It is equipped with an **innovative touchpad** that indicates temperature of the beverage and machine settings at the touch of a button.

IDEAL FOR: Frozen cocktail, slush and sorbet.

second wind

The most practical way to make your **machine look brand new**.

Tanks, taps, and lids suffer wear and tear from daily use, making the product look less appealing.

In each **second wind** you will find everything you need to replace these parts and quickly and easily make your **product more attractive** to the end consumer.

Compatible machines:

CLASSIC (SL310RSWC00)

COOL (SL310RSWC00)

COOL P&P (SL310RSWC01)

DREAM (SL310RSWD00)

SMART (SL310RSWS00)

SMART P&P (SL310RSWS01)
